

Position: Data Engineer

Location: Cardiff (Office based)

Reports to: Technical Director

About the Company:

Industore Limited is the exclusive distributor of Hänel automated storage and retrieval systems in the UK and Ireland. Industore offers modern storage solutions, transforming sites throughout the UK and Ireland with innovative design and our outstanding products including the popular Lean-Lift system and Rotomat solution. Clients vary from small to medium sized businesses to large corporates. Industore's headquarters are based in Cardiff, South Wales and Dublin, Ireland.

Job Purpose:

The Data Engineer will be responsible for designing and building systems for collecting, storing, and analysing our client's volumetric & throughput data. This role plays a key part in supporting new business proposals, improving existing operations, and implementing automation and process improvements within warehouse environments for our clients.

Key Responsibilities:

- Utilize big data tools, computer programming languages, and machine learning techniques to gather and clean large amounts of data.
- Prepare data for insight and analysis.
- Prepare data for presentation mediums suitable for clients and senior stakeholders
- Develop data-driven warehouse solutions through analysing operational data (e.g., volumes, SKUs, pick rates) to support design decisions.
- Support the design of efficient warehouse layouts, storage systems, and workflows for new and existing sites
- Support tenders, RFQs, and business development efforts with tailored solution designs.

What You'll Need:

- Excellent data analysis and problem-solving skills.
- Strong communication and stakeholder engagement abilities.
- Proficient in programming languages (Python etc).
- Strong background in the use of Power BI
